

Leading the Industry with Remediation Equipment for Over 17 Years

Turnkey Integrated Systems

Remediation systems are available on skids or in sheds, trailers, or containers, including SVE, sparge & vent, multiphase extraction, pump systems, oil/water separators, and GAC. UL certified controls, including relay logic, PLC, telemetry, and web-enabled remote monitoring.

The Original: Patented ShallowTray® Low Profile Air Strippers

ShallowTray® low profile air strippers are sized and priced to fit your specification and budget; from 0.5 to 1000 GPM and made from polyethylene or stainless alloys. Applications include organic removal such as BTEX, MTBE, Chlorinated Solvents, Ammonia, and pH neutralization via CO₂ removal, and compliance with the Lead and Copper Rule. Specify the original and patented Low Profile Air Stripper!

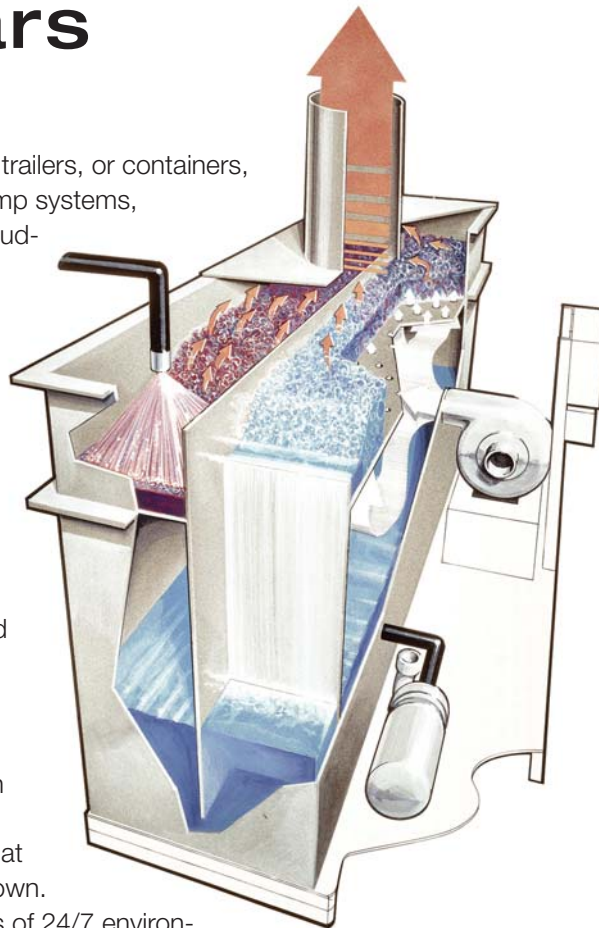

Service & Support

BISCO / NEEP Systems proven commitment to quality, customer service, and technical support is unmatched in the industry. BISCO / NEEP Systems engineering credo "It's Got To be The Best" compels us to build systems that we are confident can be relied upon as if they were our own.

They are industrial duty suitable for the demanding rigors of 24/7 environmental remediation applications. We are obligated to give you the most value for your expenditure, both to reduce your risk and to promote your reputation. With BISCO / NEEP, you and your client can bank on our performance and support. **We Cut No Corners – Period.**

BISCO / NEEP Systems Controls

A division of BISCO / NEEP Systems producing controls for industry. Specialization in fluid automation, telemetry, hazardous locations, SCADA, and review & design services. See why clients such as Boeing, ExxonMobil, Continental Airlines, Chevron Texaco, and many others rely on BISCO / NEEP Systems for complex Industrial Controls and SCADA applications.
